

To whom it may concern

The news about the plan of a nuclear waste dump in NT in a place where Traditional Owners clearly disagree shocked me. I am a student for the Master of Environment where I learn a lot about environmental impact and I have done research with and about Indigenous people. I strongly disagree with your plan and urge you not to go ahead with a nuclear waste dump in NT!

Even though I am currently living in NSW, I also work in NT and love the country there.

Kind regards
Karin Ochsner
