CANBERRA ACT 2600

Dear Sir/Madam,

I write to register my wish to have the solar rebate restored and for other similar initiatives to be introduced and supported.

If you understand the overwhelming merits of this scheme you obviously need no further argument from me.

If you don't see the merits, then I can only conclude that you have vested interests, or are incapable of understanding or not sufficiently informed to make the case in your mind. Either way further explanation or argument here will have little effect.

Yours sincerely,

Paul Baxter
