Senate Inquiry <[ecita.sen@aph.gov.au](mailto:ecita.sen@aph.gov.au)>

Name: Mike Browning.  
Address: 6/54 Cunningham Tce  
Date: Daglish, WA, 6008

*M. Browning*

Submission to Ranger and Jabiluka Senate Inquiry

I ask the Senate Inquiry to recommend:

- an overhaul of the present environmental regulatory regime, to provide greater transparency and independence;
- greater involvement of traditional Aboriginal owners in the establishment and oversight of any new environmental monitoring and reporting regime;
- more statutory monitoring points at both operations and a greater frequency of monitoring;
- event-based monitoring, whereby weather events trigger immediate response monitoring;
- that the so-called 'limit' for uranium concentrations detected in Kakadu National Park downstream of the operations be reduced from 5.8 parts per billion to 0.5 parts per billion.
- return unprocessed ore down the Jabiluka decline, which can be cemented in and revegetated
