

I am writing to protest in the strongest terms about the proposed new media laws. This is not about building a better democracy but feathering the nest of Murdoch and co. A payback for the Political support Johnny has received. How can our democracy thrive on one or even two peoples point of view. This is wrong on every level and will have its consequences at the next election if not before, Look how well a one media mogul policy worked in Italy, corruption was every where. To those in the Senate who claim to uphold the principles of true democracy and free speech now is your chance to stand up.
