Rental Housing

1.1 Further to my last submissions regarding the Housing.

2. This I have learnt only to-day.

3. One of those people I have mentioned has got the for sale sign up, his next door neighbour has gone, only in the house for a few weeks, now the other tenant at 80 years of age is worried sick that he is the next just not good enough in Australia.

2. Case Number 2

A veteran also has had to move out of his rental accommodation, because the owner's daughter has split with her husband and moved in.

3. With the people who have lost their houses due to floods now we have both old and family's, plus single people needing homes and those who put out of their homes.

It is about time the Government created a ministry of Works to get this job done. Not private firms, because some are not stable enough and go broke.

4. To add insult to injury I find this in the paper which I find a utter disgrace. (See attached).

5. Small Business

This is another area that needs looking at, people have invested in creating not only income for themselves but it jobs also for young people to loose everything they have invested in due to the present situation.
