

The main reason there are so many refugees at this time is because the west ie: the US, Britain, France, Germany, Italy, Portugal to name some, have profited over the years by colonising parts of the world and setting up dictatorships to suit themselves and getting involved in wars to advance their own interests, Vietnam, Iraq, Afganistan etc. We now have to deal with the results and it is our duty to take refugees from the countries we have disrupted. Refugees should be assessed here and allowed to live and work while being assessed.
